Summary

Gameplay programmer and game development student working with Unreal Engine/C++ and Unity/C#, with eight years of independent learning and project work. Built solo games and collaborated with teams on gameplay systems, enemy coordination, procedural content and multiplayer synchronization.

Technical Skills

Languages and engines: C++, C#, Python, SQL, Unreal Engine, Unity

Gameplay: Combat systems, enemy AI, procedural generation, multiplayer synchronization, chunk-based terrain, Unity ScriptableObjects

Projects

Ren: Path of Destiny | Unreal Engine, C++

Game Programmer | June 2026 - Present

- Built enemy coordination using the Hungarian algorithm to assign enemies to tactical positions while minimizing combined assignment cost.
- Developing combat and environment interactions that connect combat abilities to traversal and obstacle challenges.

Digging Game | Unity, C#

Solo Game Programmer, Artist and Designer | 2026

- Implemented chunk-based terrain that groups sand blocks into shared objects to limit per-block object overhead.
- Built a chest spawning system with ScriptableObjects, exposing chest counts and rarity per chunk for balancing without changing gameplay code.

Ruin Runners | Unity, C#

Solo Game Programmer, Artist and Designer | 2025

- Implemented real-time movement synchronization and packet handling for a two-player online game with 10 levels of increasing difficulty.

Word Search | Unity, C#

Game Programmer | 2026

- Built randomized word grids across 30 levels, with difficulty increasing in five-level tiers.
- Exposed time limits and word counts through ScriptableObjects for balancing in the Unity Inspector.

Education

B.Sc. Game Design and Development

ICAT Design and Media College | August 2024 - June 2027 (expected)

Game Jams

Completed three game jams: Lost Trance (Global Game Jam 2026), Ben 3 (BYOG 2025), and Bubble Parkour (Global Game Jam 2025).
